The fabulous Miura is one of the most sought after sports car in the world, combining high performance motoring (0-60 mph 4.7 secs. 0 - 100 mph - 10.8 secs. top speed 186 mph) with the ability to carry two persons in luxurious comfort and safety.

The V.12 four litre engine mounted rear transverse, develops 370 bhp at 7.700 rpm. It has seven main bearing crankshafts with two connecting rods per crank. Distribution is by four overhead camshafts driven by two silent chains, 4 triple choke Weber carburettors are fed by an electric fuel pump.

The high speed roads of Europe and some of the Continents most famous Formula One racing tracks were used by Pirelli to develop a Cinturato radial ply tyre especially for the Lamborghini Miura.

The car became the first in the world to fit the advanced Pirelli Cinturato GR70 VR 15 radial, which thrives on ultra high speed motoring. This squat, low profile Cinturato gives the best in straight line stability and cornering adhesion in the wet, dry and snow, with maximum comfort.
